SUMMARY

Recent IT graduate and full-stack developer who loves turning ideas into working prototypes quickly. I have hands-on experience building backend services with .NET/C# and the PERN stack, and I enjoy connecting LLMs and workflow tools like n8n to fix inefficient business processes. My main focus is on rapid development and building practical web and mobile apps that genuinely help users.

TECHNICAL SKILLS

Languages & Tools: C#, .NET, React Native, React, Node.js, Express, NestJS

Databases: PostgreSQL, MSSQL, SQLite

AI & Automation: Retrieval-Augmented Generation (RAG), n8n, Microsoft Power Automate, OpenClaw, Claude, Gemini

Core Concepts: Full-Stack Development, Autonomous Agents, Rapid Prototyping, API Integrations

EXPERIENCE

AI Automation Engineer Intern — GoTeam

January 2026 – May 2026

- Helped set up local development environments and integrated basic AI agents to make internal team workflows smoother.
- Built automated workflows using Microsoft Teams and Power Automate to take care of repetitive admin tasks, like signature requests and DTR reminders.
- Created custom n8n workflows to support daily operations, including a weather tracking system and tools for medical administration.

Software Development Trainee — Alliance Software Inc.

December 2025

- Completed the intensive ASI-Jumpstart bridge program, focusing heavily on core coding concepts and problem-solving techniques.
- Designed and built backend services and database structures using .NET, C#, MSSQL, and SQLite for several application features.
- Collaborated with a team of trainees to build software projects from the ground up, gaining practical experience in agile development.

PROJECTS

Smart Portfolio | AI-Powered Personal Site

- Built a personal portfolio website featuring a custom AI chatbot powered by Retrieval Augmented Generation (RAG).
- Programmed the chatbot to instantly answer questions from visitors and recruiters about my background, skills, and projects.

Craftopia | Upcycling Platform

- Wrote the main research proposal and mapped out the core features for an upcycling app geared toward college students.

EDUCATION

Bachelor of Science in Information Technology

University of Cebu – Main Campus | Graduated: May 2026
